Aligning Clinical Decisions with Hospital Reality, Q&A

Moderator Matthew Reiner, DPM

- 8:15 PM – Open Discussion + Q&A

- 8:45 PM – Key Takeaways

- 9:00 PM – Adjourn

The Mission of Paragon 28®

Our mission is to strategically build a company around the core principles that **drive innovation and quality**. Relentlessly working to advance the science behind foot and ankle surgery.

Paragon 28® History

In 2010, Paragon 28® was established as an orthopedic foot and ankle company.

The name "Paragon 28" was chosen to show that we are exclusively a foot and ankle company, with the "28" representing the number of bones in the foot. We will remain true to that vision. Paragon 28 was started as a small, family-based company and we have kept those core ideals as we have grown.

Our first product was the Monster® Screw System, followed by the Gorilla® Plating System. As we continue to add more products, we maintain a fine level of detail to every feature of every product we design. The goal is to give options to the foot and ankle surgeon, knowing there is more than one way to achieve a great result. We have listened to surgeons and will continue to do so in order to understand and address their specific needs.
